

## Troop 97 September campout: Caving Trip

On september 22, Troop 97 went out to the Lost River Caverns to finish the geology merit badge. The campsite was nice, three adirondacks per section, with two sections. One for the adults, and one for the scouts. At 11:00 on Saturday, we all drove to the Lost River Caverns to go inside.

When we went inside, it was beautiful. There were odd bumpy walls and small ponds everywhere. We were shown these cool rocks that glowed in black light. Most of the glowing stuff in the rocks turned out to be calcium, the very thing making up our bones. The guide decided to shine the black light on his teeth, and sure enough, they glowed. There were some amazing sights to behold.

When we got back, there was not much to do. We all just hung out, went to the trading post, all that stuff. It was very windy. After all of that, we went home the next day.
